Real Time Fleet

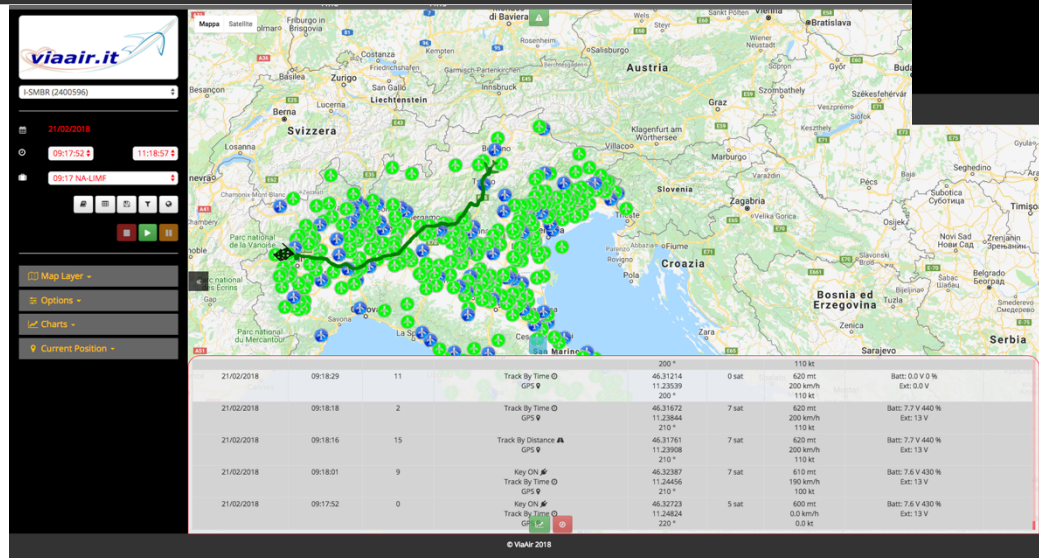

**SATELLITE MONITORING:
YOU TO KNOW THE STATUS
OF THE AIRCRAFTS IN
FLIGHT IN REAL TIME
THROUGH THE
GROUND STATION**

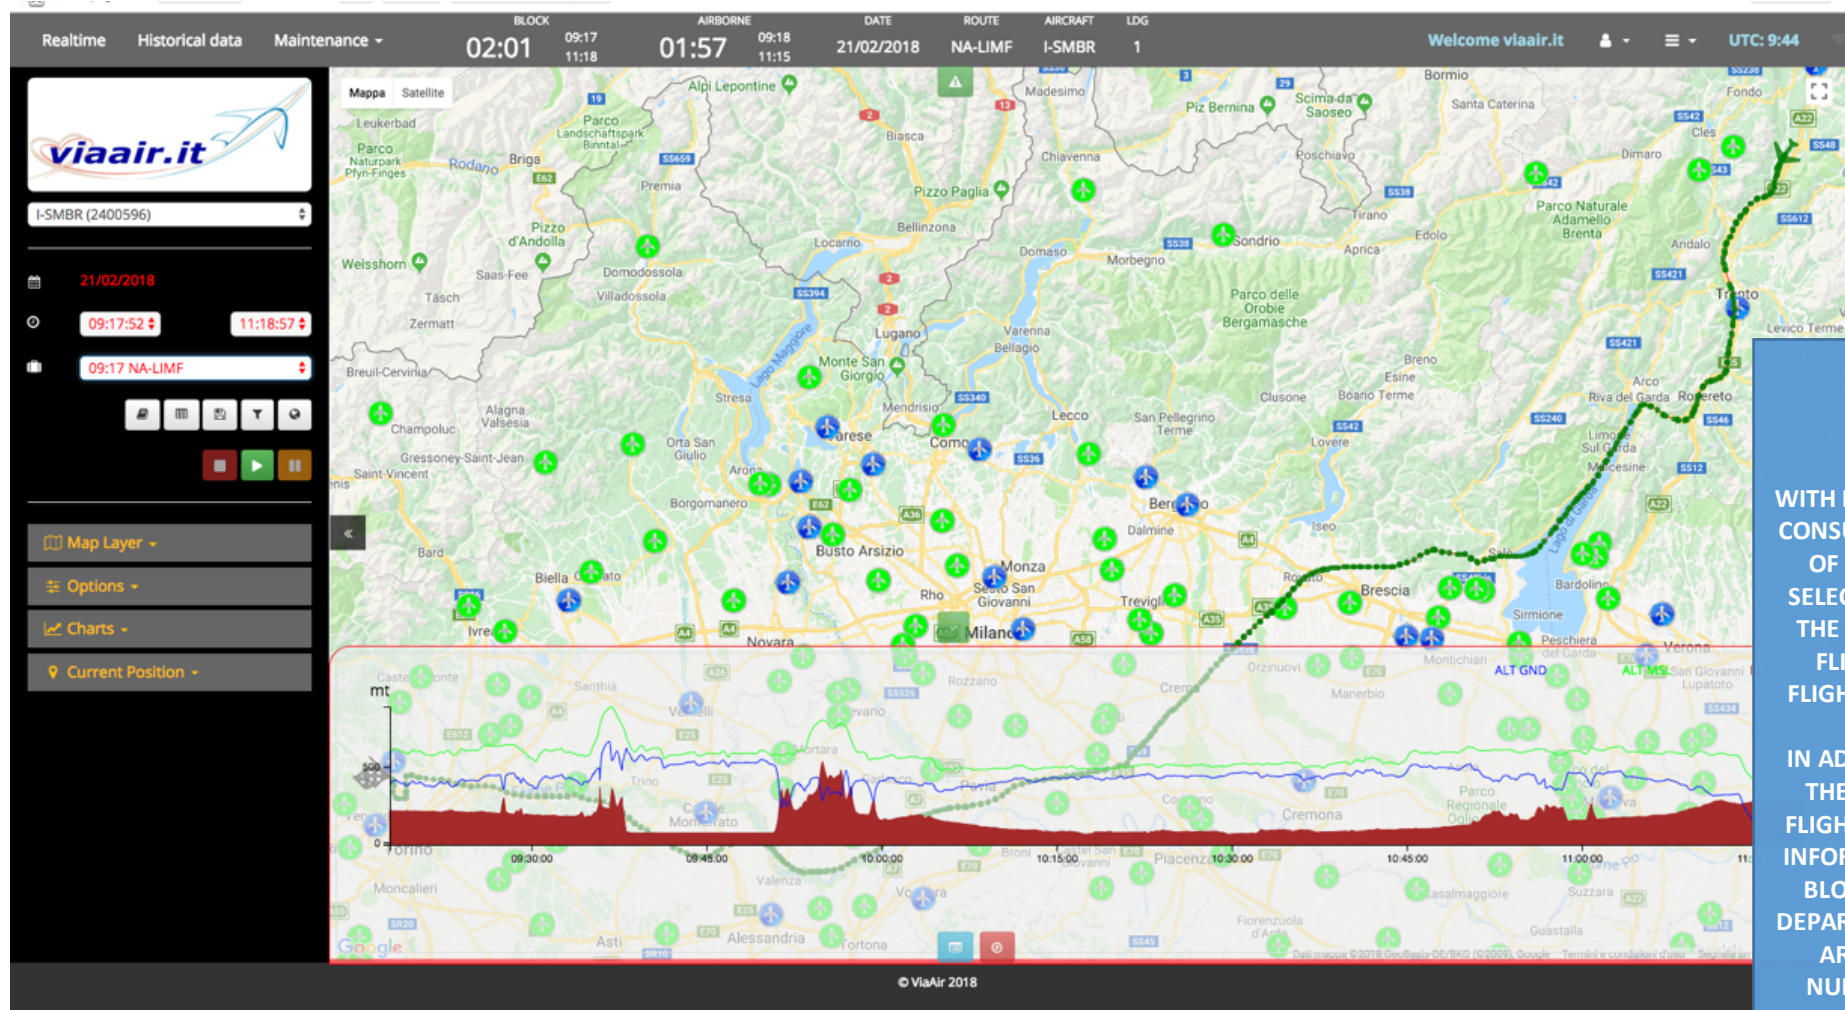

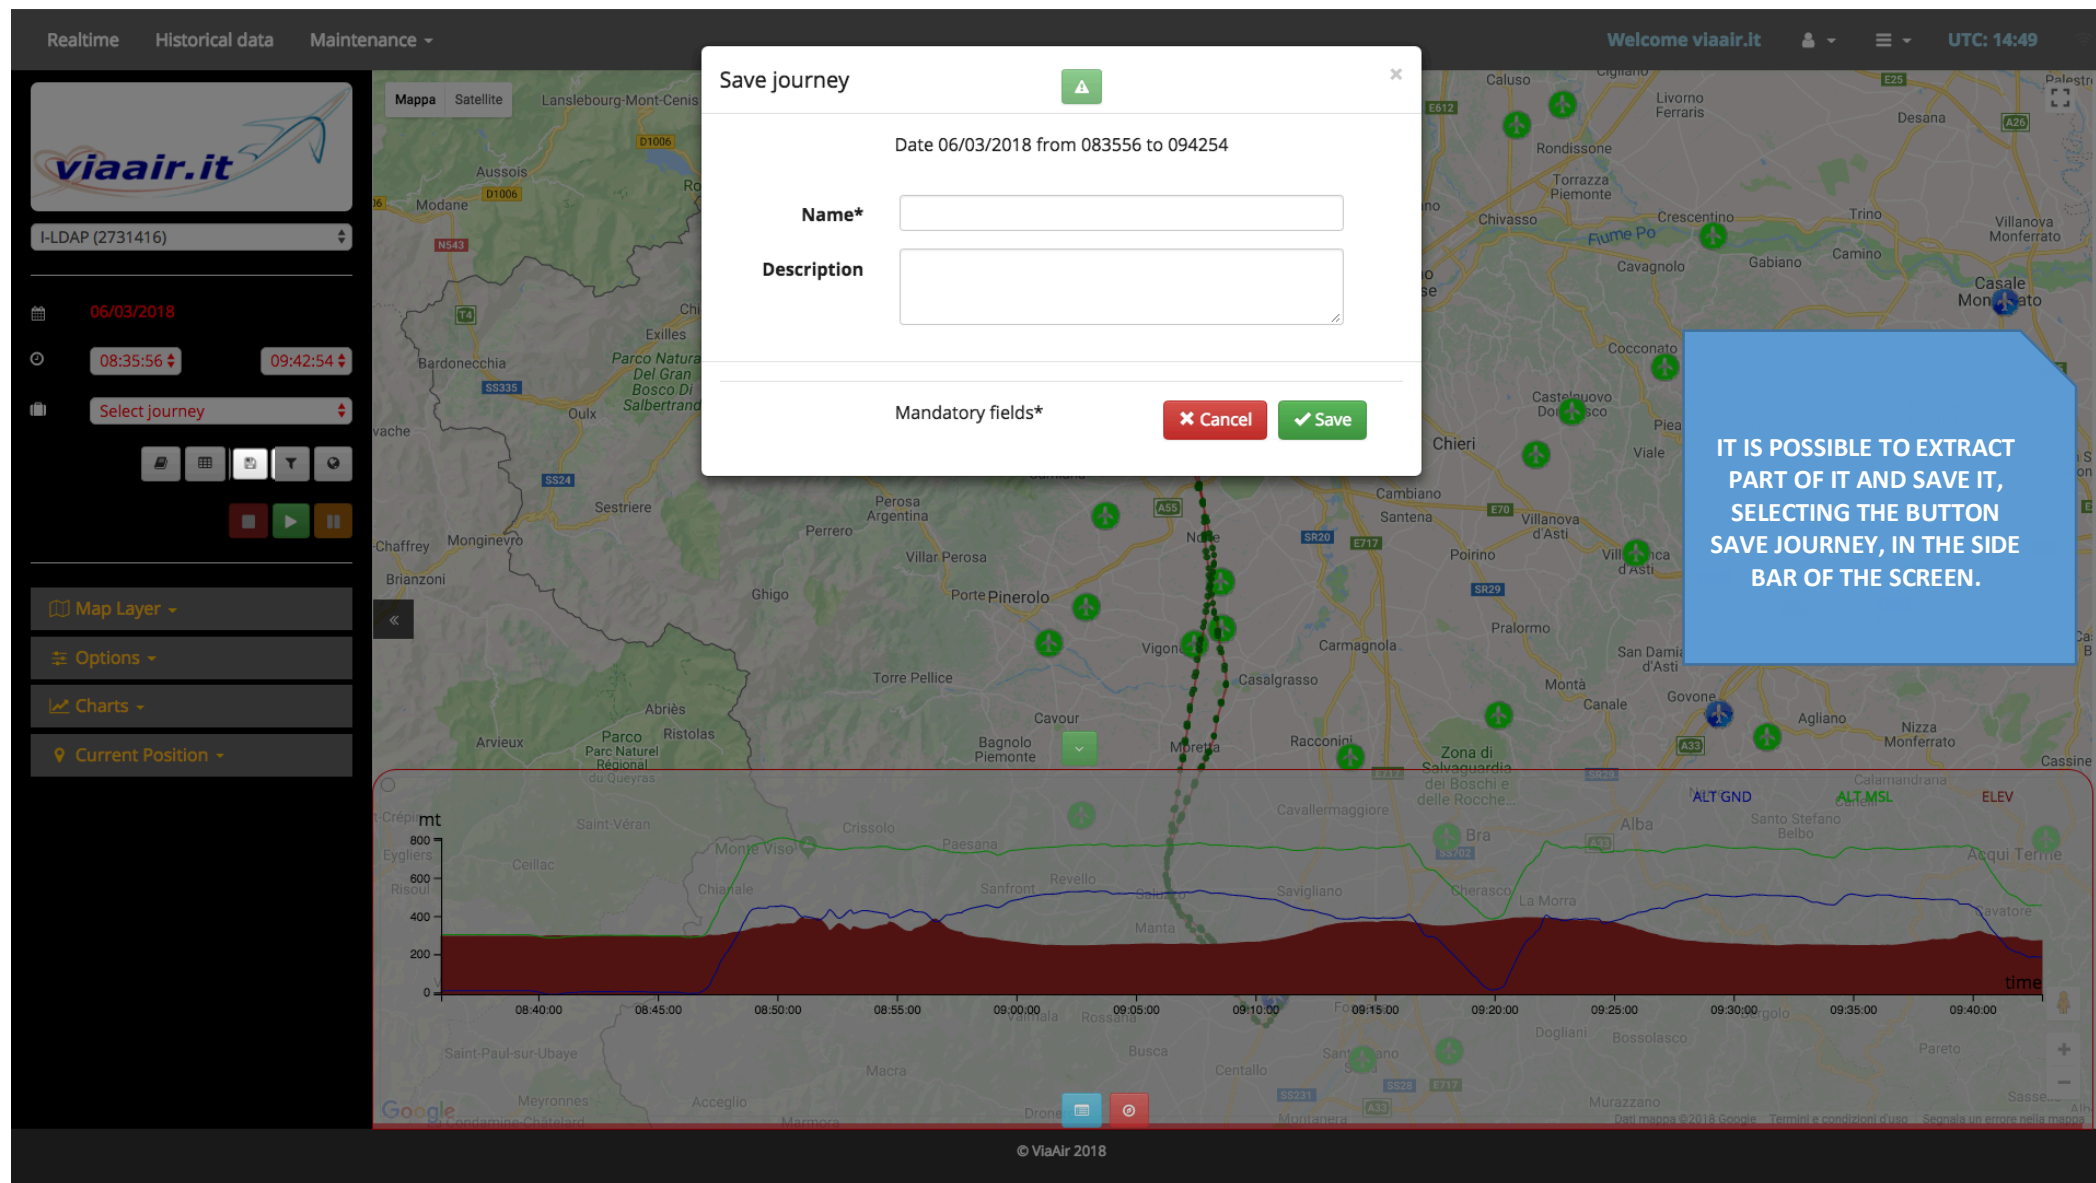

**TRACKING OF FLIGHT IN
REAL TIME
WITH THE POSSIBILITY
OF ACCESSING TO THE
INSTRUMENTS SUCH AS:
COMPASS - ALTIMETER -
GND SPEED, THE LIST OF
EVENTS, THE
ALTIMETRIC PROFILE OF
FLIGHT AND THE SPEED
GRAPHIC.**

WITH HISTORICAL DATA, WE CONSULT THE LAST 5 YEARS OF FLIGHTS MADE , BY SELECTING THE AIRCRAFT, THE DATE IN WHICH THE FLIGHT IS MADE, THE FLIGHTS ARE RECOGNIZED IN AUTOMATIC. IN ADDITION WE CAN SEE: THE TRACK OF FLIGHT , FLIGHT TOOLS, THE FLIGHT INFORMATION SUMMARY: BLOCK TO BLOCK TIME, DEPARTURE'S AIRPORT AND ARRIVAL'S AIRPORT, NUMBER OF LANDING.

The screenshot displays the viaair.it WebDataMap interface. On the left, a sidebar contains navigation options: Realtime, Historical data, and Maintenance. Below these are controls for selecting a journey (I-LDAP 2731416), a date (06/03/2018), and a time range (08:35:56 to 09:42:54). A 'Select journey' dropdown and a 'Map Layer' section with options like Options, Charts, and Current Position are also visible.

The main area shows a map with a flight path (green line) and a corresponding altitude profile (blue line) over time. A 'Save journey' dialog box is open in the center, prompting the user to save the current journey. The dialog includes fields for 'Name*' and 'Description', and a 'Mandatory fields*' label. The 'Save' button is highlighted in green.

A blue callout box on the right side of the map states: "IT IS POSSIBLE TO EXTRACT PART OF IT AND SAVE IT, SELECTING THE BUTTON SAVE JOURNEY, IN THE SIDE BAR OF THE SCREEN."
